Think Globally
Act **Locally**

Standardizing
on one global
product, what
could be
easier?

A single product with all the ratings you need

BRING YOUR ATEX, IEC, NEC, AND CEC NEEDS TOGETHER IN ONE PRODUCT

Whether you are looking to expand your business to global markets, or struggle with time constraints having to custom design each system particular to where it is going in the world. We at R. STAHL can help. With our universal package of products, you can specify one product for anywhere in the world. **Whether your job is going to Angola, Russia, Europe, or Houston, our one product will meet all the standards.** Don't have time to tackle standardization of products?

Let our team of engineers help you. R. STAHL can work with you to take the load off your already busy pace. We can take a custom look at your needs and requirements. **We can assist you in the proper selection of a true global product.** Since our expertise is in explosion proof and explosion protection, we can provide you best practice solutions to your application.

USING NEW DIVISION 2 TECHNOLOGY

- PROVIDE ATEX, IEC, NEC, AND CEC LISTINGS ALL IN ONE PRODUCT.
- REDUCE YOUR NEED TO CUSTOM DESIGN EACH TIME.
- MINIMIZE THE NEED TO UNDERSTAND ALL FACETS OF THE CODE
- LONGER LIFE
- LOWER INSTALLED COST
- EASIER MAINTENANCE

One Product Fits all your global needs

New Technology Provides the Lowest Installed Cost!

The **R. STAHL Global Solution** lowers your installation time by over 40%. Avoid the time consuming traditional "bolted" technology that relies on dozens of bolts and delicate ground joints to protect your installation. Newer technologies eliminate the need for such antiquated systems. The **R. STAHL Global Solution** increases the life of your installation using our high impact resistant polymer material giving your installation the strength you require and the NEMA 4X corrosion protection you need.

Increase Your Safety

With the **R. STAHL Global Solution**, you'll no longer need to rely on dozens of bolts, and finely machined ground joints to prevent an explosion from propagating through your facility. Gone are the safety hazards of losing bolts, scratching, or rust interfering with the ground joint.
